- Experienced in working in a team from diverse backgrounds and cultures.
- Data-driven problem solver.

About Me

A fresh graduate of Applied Statistics with a Distinction average, in-depth data manipulation knowledge and skilled in analytics tools such as R, SQL, Tableau, and Excel. I'm seeking an opportunity to apply and further learn data manipulation methods and use the latest computational techniques to analyse and interpret data. I have more than six years of experience managing complete development project life cycles for a UN agency and NGOs, involving data collection and analysis for proposal writing, M&E and decision-making.

Professional Experience

Avant Mutual | Data Entry Officer

2022 (casual)

Key responsibilities:

Reviewing, verifying and compiling data in the database system.

Oxfam in Viet Nam | Program Officer
